Dearest Folks & Sis, The area & base are finally getting dug out from the 3" or more of ash from the volcano 80 miles west of Anchorage. The dust & ash have been horrible & will be, until a good rain settles it. It is so fine it seeps into everything - even locked suit cases. Our furniture won't be here for a month or longer (glad it wasn't here for the excitement?! & dust), so were camping out in the apt. on borrowed necessities. Your last letter to the Hostess House was forwarded. Love to all. Jan & Loop
